Our Mission

tion District is dedicated to providing the highest

The McHenry Township Fire Protection District is dedicated to providing the highest level of fire and rescue services to the communities it serves, through the commitment, preparedness, continuing education and training of its most valuable assets, its members, who work to assure the safety of the District's citizens on a daily basis.

Highlights 2010

- Conducted Officer Testing for Battalion Chief/Shift Commander Position.
- Conducted Officer Testing for a Deputy Chief Of Operations.
- All radio equipment including transmitters, receivers, mobile radios and portable radios were converted to Narrow Band.
- 500' of 5" hose was added to 6 Fire Engines for Rural Water Supply.
- Upgrade the department computer system by installing Comcast fiber-optic lines to each of the 4 stations. The computer upgrades increase the speed and ability to write fire and EMS reports.
- Trustee Chris Bennett
 was reappointed and
 Alan Weaver replaced Trustee
 Phil Bartmann who resigned as
 a Trustee after 45 years of

- service to the McHenry Township Fire Protection District.
- Rudy Horist was sworn in as the new Deputy Chief of Operations on June 17, 2010.
 Deputy Chief Horist served as a career firefighter for the City of Elgin from January 26, 1986 where he served as the training officer, lieutenant, captain and assistant chief. Deputy Chief Horist is responsible for the management of emergency operations.
- In 2010 the MTFPD initiated an EMS Peer Review Committee consisting of individuals that review every single EMS report. The purpose of the committee is an internal oversight to review all EMS activity.

Firefighter Jerry Schillaci with assistance from MTFPD members sold over 1,000 pink tee-shirts in support of the

- American Cancer Society.
 Firefighters wore pink tee-shirts both on and off duty to show their support for the American Cancer Society as well.
- In 2009, the MTFPD upgraded electric fixtures and gas appliances in an effort to reduce costs. A 12 month review of gas and electric charges indicated an 18.5% savings over the previous year. The upgrades to gas and electric fixtures and appliances were paid for by a grant from the Illinois Department of Commerce and Economic Opportunity—Bureau of Energy and Recycling.
 - Officer Testing for Company Officers including Captain and Lieutenant was completed. Dave Harwood finished Number 1 on the lieutenants list and will fill the vacant lieutenant position.
- Assistant Chief Joe Krueger completed the Executive Fire Officer program. Chief Krueger is the first chief officer in the history of the McHenry **Township Fire Protection** District to complete the 4 year Executive Fire Officer program at the National Fire Academy in Emmitsburg, Maryland. The 4 year program included Chief Krueger attending a 2-week class in Emmitsburg each of the 4 years and then returning home and writing an extensive research paper on a topic specific to the class he attended that year. Congratulations Chief Krueger on the completion of a fantastic program. Your hard work and dedication to the fire service is obvious and very much appreciated.

McHenry Township Fire Protection District

Chief Tony Huemann

Tony Huemann

Welcome to the second version of "Fully Involved". "Fully Involved" is the McHenry Township Fire Protection District's (MTFPD) way of communicating with each and every resident of the fire district by illustrating the continued activities of all the firefighters, paramedics, EMT's and officers that make the McHenry Township Fire Protection District work so well.

In 2010 the MTFPD responded to 4,888 emergency calls. All of those calls were answered by part-time personnel that make up our 160 person fire department. The fire district employs part-time personnel to fill 13 positions (Paid On Premise or P.O.P.) each and every day of the year. There are 4 stations in the fire district and there are 3 firefighters/paramedics/EMT's at each station that jump between an ambulance and an engine depending on the type of incident that is dispatched. There is also a part-time shift commander that is responsible for managing personnel and daily activities such as training, public education events, station maintenance and vehicle maintenance.

In the event that an incident is too large or too complicated, the Paid On Call (P.O.C.) firefighters are requested to respond from home or work to support the POP personnel by responding to the incident with additional apparatus and equipment. This system works well due to the willingness and dedication of all of our personnel to participate during their days off, at night, on weekends and on holidays.

There are other reasons why the MTFPD works so well. There are 2 full-time Assistant Chiefs that manage the day to day activities of the Fire Prevention Bureau, EMS activities and the training activities. There is a part-time Deputy Chief that manages the

daily schedule and the big task of vehicle maintenance and there is also a full-time Deputy Chief that manages the day to day emergency operations.

There are 3 full-time administrative people that manage the day to day business of the fire district. There is a Business Manager and 2 Secretaries that assist all of us with reports, paying bills, purchase order requests, payroll, creation of the monthly Trustee Packet and management of the annual budget.

Finally, the MTFPD is very fortunate to have 5 Trustees that are businessmen from the community. The 5 Trustees oversee the financial aspect of the fire district and I report directly to them at a monthly meeting. In 2010, Trustee Phil Bartmann retired from the MTFPD after serving as firefighter, lieutenant, captain, assistant chief and trustee since 1964. Alan Weaver who is a career firefighter with the Wauconda Fire Department and lives in Lakemoor, replaced Trustee Phil Bartmann on the Board. Trustee Weaver has been and will continue to be a great addition to the fire district.

I would like to personally take this opportunity to thank the firefighters, company officers, chief officers, administrative staff and trustees for their hard work and dedication to the McHenry Township Fire Protection District. Because of you — our organization is respected and viewed as one of the best fire districts in the State of Illinois. "Thank You".

I hope each and every resident of the fire district enjoys "Fully Involved" as much as we enjoy serving the residents of the fire district.

a. T. Nuemun

FULLY INVOLVED

Welcome to the McHenry Township Fire Protection District's second edition of "Fully Involved". The term "Fully Involved" in the fire service means that fire has totally consumed an automobile, a garage, a house or commercial building. A fully involved fire means great danger for occupants and potentially greater danger for the firefighters who enter the building to save lives and property. Before entering a building that is fully involved, firefighters prepare themselves through training and education and by having the right tools and equipment with them to make a difference on the fire without putting each other in an unsafe

The intent of "Fully Involved" is to educate residents on fire and rescue operations and to illustrate yearly activities of the McHenry Township Fire Protection District. We are proud to present "Fully Involved" and we hope that after viewing "Fully Involved" you will feel more involved and more aware of the activities of the McHenry Township Fire Protection District.

McHenry Township Fire Protection District 2010 Training

- Total training hours for 2010 were 20,758. This is an increase of 53% over last year and averages out to 130 hours per firefighter.
- Physical training hours for 2010 totaled 3,551 hours. This averages out to 22 hours per firefighter.
- The MTFPD Training Committee was formed. The original committee consisted of 23 firefighters and fire officers. The committee established the following vision and mission:

Vision Statement:

Through education, preparation and application, the MTFPD has the knowledge and skills to:

- Accomplish its mission safely.
- ✓ Exceed stakeholder training expectations.
- ✔ Provide services that exceed our customer's expectations.

Mission Statement:

Provide learning opportunities for MTFPD personnel that:

- ✓ Increases the body of knowledge on topics relevant to their jobs.
- Exceeds stakeholder training expectations.
- Results in continuous improvement and service excellence.

- Major training activities for the year included:
 - Firefighter search, rescue, suppression and survival training skills were practiced at an acquired structure on Ringwood Road in May.
 - ✓ Surface ice rescue training was completed at the Possum Run Pit.
 - ✓ The Fire District formed a swift water rescue team and nine members were trained to the level of Swift Water Technician II.
 - A shielding system for trench rescue was purchased and firefighters were trained in use of the system as well as initial scene stabilization in the event of a trench caye-in.
 - ✓ Two firefighters completed Technical Rescue Team training in Champaign, IL
 as part of the Illinois Terrorism Task Force.
 - ✓ EMS proficiency testing was completed for all members.
 - Rapid intervention training was completed in conjunction with firefighters from the Crystal Lake Fire Department at an acquired structure owned by MCC.
- 119 Illinois OSFM certifications were earned in 26 different specialties by MTFPD firefighters and fire officers.
- Three chief officers completed Executive Fire Officer course work at the National Fire Academy in Emmitsburg, MD.

McHenry Township Fire Protection District Stations and Staffing

Minimum Daily Staffing = 13

JUMP COMPANY EXPLANATION - Each day is divided into two, 12 hour shifts with each shift consisting of 13 highly trained and dedicated part-time personnel. Each of these individuals are cross-trained as either a Firefighter-Emergency Medical Technician (EMT) or Firefighter-Paramedic. Twelve of these personnel are organized into four, three person crews with one crew assigned to each of our four stations. The remaining person assigned to shift is either a Captain or Lieutenant who serves as the Shift Commander for all four stations.

Firefighter

The crew at each station staffs either a fire engine or an ambulance depending on the type and location of an alarm. This provides the department the flexibility to send the type of vehicle most appropriate for a particular type of emergency. Two of our stations also have additional vehicles or specialized apparatus that can be staffed by either the on-duty crews or off-duty personnel who are notified to respond via pager.

This picture is a bariatric tarp, made by Ferno that we carry on our 5 ALS ambulances. These tarps are used to assist in lifting our larger bariatric patients.

2010 Facts and Figures Incident Type

2010 Call Breakdown by Incident Type

Our busiest response activity is for Rescue Calls, which account for 73% of our total incident responses. The majority of these incidents are for medical emergencies; however, this category also includes motor vehicle accidents and technical rescue incidents. Nine percent of our responses are for service calls - the majority of which are to provide lifting assistance for those with mobility issues. False Alarm and Good Intent incidents combined account for 12% of our incident responses. These include both unintentional activation of fire alarm systems and calls from the public that turn out to be unfounded. Hazardous Condition incidents consist of primarily carbon monoxide incidents, natural gas leaks and gasoline spills. They account for 3% of our alarm activity. Finally, fire incidents, which include building fires, vehicle fires and brush fires account for 3% of our incident activity overall.

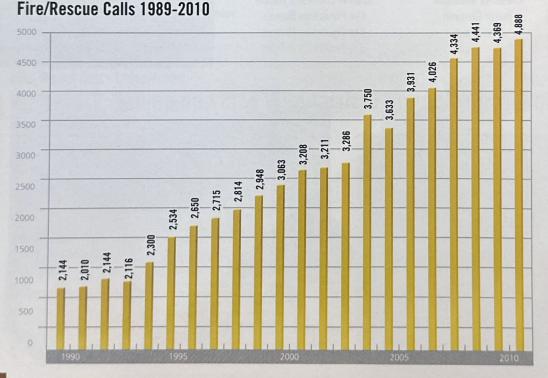

2010 Facts and Figures Fire/Rescue Calls

The Fire District responded to 4,888 calls for help in 2010. Although this was a 12% increase compared to 2009, the district has experienced an annual increase of 3.5% in call volume over the past ten years.

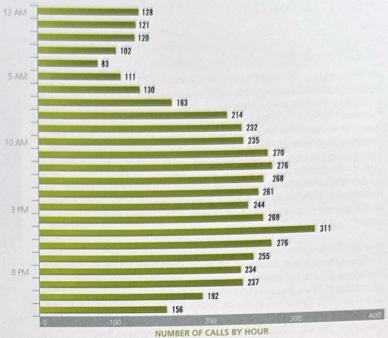

2010 Facts and Figures Number of Calls

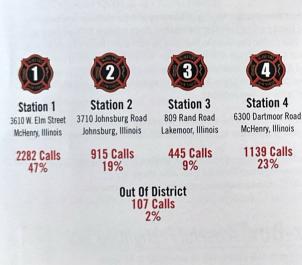

Number of Calls by Day and Alarm Time

Along with an understanding of where our incidents occur, it is also important to know when they occur. While our incident activity is consistent from day to day, there is a marked increase in volume between the hours of 10 a.m. and 10 p.m.

2010 Facts and Figures Incident Occurrence

An important activity in our emergency response planning is analyzing where our incidents occur. To accomplish this task, historical incident data is tracked and plotted onto a map in one square mile increments. This information in conjunction with other risk-assessment data is used to identify staffing and equipment requirements as well as the effectiveness of our current and planned fire station locations. As this chart shows, the majority of our incident activity continues to occur in the downtown City of McHenry area.

Fire Prevention Bureau

Premise File Info

The McHenry Township Fire Protection District is proud to announce the implementation of an exciting new program designed to assist you and/or your loved ones in the event of an emergency. On August 28, 2009, Senate Bill 2057 The Illinois Premise Alert Program (PAP) Act was approved and incorporated in the State of Illinois legislative law. State legislators recognized the need to ensure that consistently high levels of public safety services are available to all members of the state, including citizens who may require special consideration in order to access services. The purpose of the program is to assist and direct the public safety workers who are responding and assisting citizens who may have disabilities or special needs. If you would like to read a copy of the act, it can be accessed on the MTFPD internet site at www.mtfpd.org or on the Illinois General Assembly's web

How can this program benefit you or someone you care about?

The Illinois Premise Alert Program (Public Act 96-0788) provides for Public Safety Agencies in the State of Illinois to allow people with special needs to provide information to Police, Fire and EMS personnel to be kept in a database. The information can then be provided to responders dealing with situations involving a special needs person. The notification expires two years after the date it was submitted. You may update or renew it at any time by filing a new form.

How can you enroll yourself or a loved one in this program?

The MTFPD Premise Alert Program "Form" can either be downloaded from the district's website at www.mtfpd.org, or by picking it up in person at the Fire District Administrative Office. Complete the form and return it to the McHenry Township Fire Protection District, 3610 W. Elm Street, McHenry, IL 60050.

Fire Hydrants Snow Removal

In the event of a fire emergency, could firefighters find the fire hydrant near your home?

Snowstorms can cause plenty of traffic headaches, but MTFPD wants people to be aware of a secondary problem that may develop.

When you're working with a shovel or a plow, please pay attention to where you are putting your mounds of snow. Too many times these piles can end up on top of a fire hydrant making it difficult or near impossible for firefighters to find. The fire department can lose precious amounts of time looking for a fire hydrant, or having to shovel one out, so we can connect to it. Try to prevent hydrants near your home or business from being buried.

We're asking people to "Adopt-A-Hydrant" on their street and keep it clear of snow in the winter. Clearing a 3 foot area around the hydrant in your yard or your neighbor's yard could be life saving. The few minutes that it takes to do this, could truly make the difference between life and death. Please dig them out if they are buried.

Smoke Alarm Check It Every Six Months!

One of the best ways to protect yourself and your family is to have a working smoke alarm that can sound fast for both a fire that has flames, and a smoky fire that has fumes without flames. A smoke alarm greatly reduces your chances of dying in a fire. Be sure to place a smoke alarm within 15 feet from every sleeping room. Check the batteries monthly and change them twice per year when you change your clocks.

Need help testing your unit or putting new batteries in? Call the District at 815.385.0075 and we'll send someone out to make sure that your detector is fully functional.

Fire Facts Did you know...

CARELESS SMOKING FIRES

According to the American Burn Association, about 900 people in the United States die each year in fires started by cigarettes, and about 2,500 are injured. About 100 of the fire deaths each year are children and nonsmokers. Nationally, annual human and property costs of fires caused by careless smoking total about \$6 billion. In 2007, there were more than 130,000 cigarette related fires.

Wireless Fire Alarms

The City of McHenry and the McHenry Township Fire Protection District have partnered to provide our local alarm customers with a superior solution that will both assist with controlling operating costs while providing for a mutually-beneficial service that offers financial savings to the end users. An ordinance has been passed for the wireless alarm monitoring and can be viewed online at www.ci.mchenry.il.us. This ordinance requires all those with existing connections to the city of McHenry's remote station to convert to the City of McHenry's Wireless Alarm Monitoring Network by December 1, 2011 and all others that are currently having alarms monitored remotely to connect by May 1, 2016.

Over the next three months, the City of McHenry and the McHenry Township Fire Protection District will be installing the wireless alarm network that will allow you to eliminate your current payments to Norshore (or your alarm vendor for monitoring services, not to be confused with maintenance service fees charged to maintain your alarm) and AT&T for the associated telephone line (do not cancel these services until a representative from the City or Fire District has confirmed that your alarm has been connected to the wireless network).

If you complete and return the monitoring agreement application to the City of McHenry prior to December 1, 2011, the City will waive the associated installation fee.

We appreciate your cooperation during the wireless alarm conversion process. Please do not hesitate to contact Assistant Chief Mike Maiercik (815-385-0075, majercikmike@fire.mtfpd.org) with any questions.

Knox-Box® A Useful Firefighting Tool

There's no need to hide a key or rely on a neighbor to be home when an emergency strikes. A hidden key can be found by a burglar. And, your neighbor isn't home every hour of the day. The Residential Knox Box is always available once installed.

The Residential KNOX-BOX is ideal for individuals:

- · With a history of medical problems
- · Recuperating from a hospital stay
- · Living alone
- · Using an electronic calling or medical alert service

The Residential KNOX-BOX is a high security key safe that only local emergency responders can access. With a Residential KNOX-BOX installed, emergency responders can respond quickly, without forcing entry. They simply remove your entrance key stored inside, provide medical assistance and re-lock your door when they leave.

Have a residential Knox Box installed. Contact the Fire Prevention Bureau for more information at 815.385.0075

Open Burning of Landscape Waste Regulations

McHenry County Public Health Ordinance Effective April 1, 2008 This Ordinance applies to all areas of McHenry County. If you live in a city with more stringent restrictions, the more restrictive rules apply.

PROHIBITED AT ALL TIMES

- Burning of manure, garbage, construction debris, trash, etc. on any property in McHenry County.
- S Burning of landscape waste within 100' of a habitable structure (i.e. residence, school, etc).
- No Burning of landscape waste within 50' of a non-habitable structure (i.e. detached garage, barn, etc).

RESTRICTIONS WHEN GREATER THAN 100' FROM A HABITABLE STRUCTURE AND 50' FROM A NON-HABITABLE STRUCTURE

- Only landscape waste and only on the property where the landscape waste was generated
- Only during the months of April, May, October and November on weekends only
- Only between dawn and dusk
- ✓ Only when the winds are less than 10 mph
- Must be supervised by an individual at least 18 years of age
- A fire extinguisher, garden hose or water source must be available at the burning site

ENFORCEMENT

Any officer of the McHenry County Department of Health, law enforcement agency, fire department or fire protection district is authorized to enforce the provisions of this Ordinance.

500' EXEMPTIONS

Burning of on-site generated landscape waste 500' or greater from a habitable structure is allowed:

- 1) During any month of the year
- 2) On any day of the week
- 3) At any time of the day

NOTE: All other prohibitions / restrictions apply.

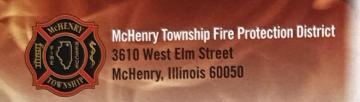

OTHER EXEMPTIONS

- Recreational fires; not larger than 3'x 3'x 3', and excludes leaves, grass or shrubbery clippings
- Ceremonial fires (bonfires) larger than 3'x 3'x 3', and excludes leaves, grass or shrubbery clippings; permit required from McHenry County Department of Health
- Habitat Reclamation or Firefighter Training
